Dear Commission,

I have incorporated many money/energy savings tips into our daily lives. Lower thermostat, on water heater and HVAC, Cold water washing, 'expensive' energy efficient bulbs. Haven't seen a change in my bill. During Christmas I had my tree on one night, and didn't use outdoor lights. Again no real change in my bill.

I oppose this increase!!!

I refuse to sit in the dark, cold or heat. But am tempted to see if my bill will reflect that drastic change.

Any help for consumer to install Solar Panels to be less dependent on SCD's constant rate increases.

Sincerely,
Betty P. O'Neal
